# HOW TO SPOT A FAKE WEBPAGE

- Pay attention to the address bar (URL): Make sure the website starts with HTTPS:// before you input any personal information.
- Check the 'domain' name: Make sure the website you are on is spelled correctly - for example: 'Amazon' instead of 'Amezon'
- Watch for poor grammar and spelling: Too many grammatical mistakes is a red flag.
- Look for reliable contact information: If you received an email from 'the company,' check out their website to see if the contact information is legitimate.
- Walk away from deals that are too good to be true: Scammers often lure in consumers with flash sales or ridiculously cheap merchandise.
