

At North Salem State Bank, the safety and well-being of our customers and staff is a primary concern. NSSB recognizes the concerns and impact of COVID-19 and, in response, has taken a number of steps to help keep you, our customers, and all of our staff healthy while limiting any impact to our ability to serve you. We are encouraging our staff to stay home if sick in order to protect you and each other.

To date, there has been no known impact of COVID-19 in any of our branches. We continue to monitor this situation daily and are following guidelines from the Center for Disease Control, local, state, and federal health officials. The staff at all of our branches are working diligently to make sure all high touch areas are sanitized and we are open and ready to serve you.

If you are unable to visit one of our branches or feel more comfortable not doing so, we do offer many methods of doing business with you electronically. Feel free to use online banking, your mobile app, your credit and debit cards, and our ATMs. If you need assistance with any of those services, please contact us at 765-676-5100.
